Alpine Route (Murodo)

## **Tateyama Tamadono Spring Water**

Tateyama Tamadono spring water is the result of snow that has accumulated on sacred Mt. Tateyama over a long period of time, forming a snow layer, which was naturally filtered over 200 to 300 years in the Tateyama strata (granite and metamorphic rock). This precious water springs from the Tateyama Fault Fracture Zone just below Tateyama's main peak Oyama (elevation 3003m). It has been selected as one of the 100 best waters in Japan. In addition, as commercially available water, it is collected at the highest point in Japan (Murodou-daira, elevation 2450m).
